SPRING/SUMMER 2011

CRYSTALLIZED™ – *Swarovski Elements*

## TECHNOLOGICAL *turns lyrical*

### **POETRY OF PRECISION**

Since 1895, Swarovski has been dedicated to perfection. True to the humanitarian values set down by its founder, Daniel Swarovski, the company is committed to nurturing the welfare of its employees, the community and the environment.

### **ELEMENTAL ATTRACTION**

CRYSTALLIZED™ – *Swarovski Elements* are the cintillating soul of design. In a vast array of constantly innovative cuts, colours and textures, they unleash boundless creativity.

### **CATALYSING IMAGINATION**

Crystal is a dream-weaver, an infinite source of inspiration for artists, artisans and designers in all creative fields. Swarovski's team of trend experts soak up the Zeitgeist and share their insights with our partners.

### **LOVE AT FIRST LIGHT**

Crystal has the power to stir emotions, to awaken the senses. Perfect, light-filled, endlessly versatile crystals transform creative visions into objects of desire. "Made with CRYSTALLIZED™ – *Swarovski Elements*" is a declaration of authenticity and integrity.

Information on Certificates and Compliance of  
CRYSTALLIZED™ – *Swarovski Elements*

## MORE THAN 100 YEARS OF *innovation AND experience*

Swarovski has been dedicated to perfection in all aspects of crystal creativity since 1895. Today, Swarovski is an inspiration to the entire design world in terms of precision-cut crystal.

## RESPECT AND *responsibility*

Swarovski products all reflect the company's corporate values of respect, integrity and social and environmental responsibility.

CRYSTALLIZED™ – *Swarovski Elements* are synonymous with the spirit of innovation – not only from a design perspective but also with regard to certificates and compliance to laws governing health and safety.

### **OEKO-TEX CERTIFICATE**

CRYSTALLIZED™ – *Swarovski Elements* are certified according to Class II of the Oeko-Tex-Standard 100, an international quality label for harmless textiles. The Class II standard for the textile industry regulates textiles that are in contact with the human skin. The standard regulates thresholds for specific health damaging substances (if concentration is too high), a standard even more strict than present laws.

### **EN71/3 AND ASTM F963-03 CERTIFICATE**

CRYSTALLIZED™ – *Swarovski Elements* fulfill the EN71/3 and ASTM F963-03 norms with reference to the allowable solubility of substances defined in aforementioned norms for children's toys.

### **PLATINUM FOILING AND M-FOILING FREE OF HAZARDOUS SUBSTANCES**

The foilings used for CRYSTALLIZED™ – *Swarovski Elements* are compliant according to 16 CFR 1303 and do not exceed the lead limit for surface coatings.

### **ROHS COMPLIANCE**

The RoHS Directive which is in effect since July 1, 2006 regulates the use of certain hazardous substances (e.g. lead, cadmium, mercury, ...) in connection with electrical and electronic equipment.

Based on the exemption granted to the glass industry for bound lead in crystal glass, the majority of our crystal assortment\* may be continued to be used in the area of electric and electronic devices.

\* At time of printing non RoHS-compliant colours are: Citrine, Dark Red Coral, Emerald, Fireopal, Garnet, Hyacinth, Light Siam, Olivine, Palace Green Opal, Siam and Sun

## REACH

The Registration, Evaluation and Authorization of Chemicals is a new EU regulation that came into force on June 1, 2007. Under this regulation, manufacturers or importers of chemicals must pass on information about chemicals that are contained in the products they provide. This information needs to be provided both to customers and to the European Chemicals Agency. Swarovski fulfils all the requirements of the REACH regulation.

For further information regarding compliance and/or application recommendations please refer to our business website [WWW.SWAROVSKI.COM/CRYSTALLIZED](http://WWW.SWAROVSKI.COM/CRYSTALLIZED) or to our Application Manual.

**Catalysing Imagination by exclusive Designer Edition Products**

&lt;&lt;&lt;

Swarovski can look back with pride on a long history of partnerships with many fashion and design legends like Coco Chanel or Christian Dior. The Arora Borealis effect, for example, found worldwide acclaim following work with Christian Dior in the 1950s. More recently, the creative partnership with Giorgio Armani saw the development of the Diamond Leaf cut, which features an organic design and closely resembles a natural leaf. Nature has also provided the inspiration for the latest joint project with the French designer Andrée Putman. These design co-operations are joyful collaborations that always result in beauty and quite unconventional displays of creativity.

But Dior, Armani and Putman are just three examples of the many celebrated designers who have worked with CRYSTALLIZED™ – *Swarovski Elements* over the years, turning loose crystals into limitless creative possibilities.

**Designer Editions assortment**

&lt;&lt;&lt;

In this year's Spring/Summer launch we proudly introduce three new shapes to complete the Designer Editions of Fantastic Flowers by Andrée Putman: The Lotus, the Ginko and the Zinnia Pendant.

**CRYSTALLIZED™ – *Swarovski Elements* presents Fantastic Flowers by Andrée Putman**

&lt;&lt;&lt;

Inspired by the fascinating organic shapes of flora and fauna, Andrée Putman, the grande dame of French interior design, has joined hands with CRYSTALLIZED™ – *Swarovski Elements* for a glittering celebration of nature by creating six pendants, the Fantastic Flowers. For this, the latest collaboration between CRYSTALLIZED™ and leading international designers, Andrée Putman explores the exotic complexity and mysticism of the lily, orchid, lotus, zinnia, ginkgo leaf and the ethereal, delicate qualities of the dragonfly.

**Andrée Putman: "Not enough has been said about the richness and diversity of flowers, nor the enchantment they inspire."**

Ceramics is the second range in this new era of CRYSTALLIZED™ – *Swarovski Elements* “Fusion Concepts” products. These articles are completely new and compliment the existing CRYSTALLIZED™ – *Swarovski Elements* range, including Crystal Mosaic, not only represent an entirely new look but are also the first loose products made from material other than crystal. The extraordinary assortment is available in four exciting colours that are reminiscent of a typical ceramic colour palette.

## Ceramics

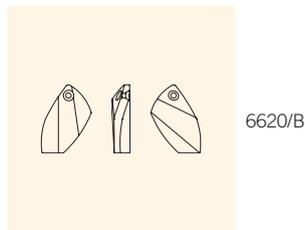

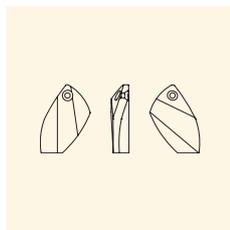

<<<

Ceramics is a truly original material innovation developed by the Fusion Concepts line. This is a product that not only features a craquelling glaze finish but is also inspired by modern graphic colour contrasts, clay and ceramic sculptures and artefacts from an archaeological excavation. Its innovative design opens up even more possibilities for dazzling creations combining CRYSTALLIZED™ – *Swarovski Elements* and Ceramics by using complementary cuts and shapes from the entire CRYSTALLIZED™ – *Swarovski Elements* assortment.

## Article Explanation

<<<

Ceramics article numbers follow the already known article groups and numbers, however /B is added to the original article number to distinguish between Ceramics and crystal variants.

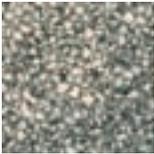

Application Guidelines

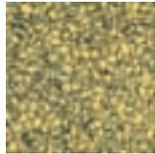

Because of sharper hole edges, it is worth considering using a stronger thread (nylon coated wire) for your designs.

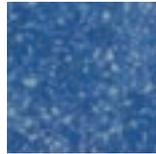

Available Ceramics Colours

## Application Advice & Care Instructions 2035 Chessboard Circle/2770 Wing Flat Back Hotfix

<<<

### Hotfix Application

2035 Chessboard Circle and 2770 Wing Flat Back Hotfix can be applied by using a standard heat press. The following parameters should give you an overview about the possibilities of applying these products onto different fabrics. In order to ensure the right conditions and to establish the best choice of application aids, we strongly recommend carrying out tests with the original fabrics.

	Temperature and approx. time (in seconds)					
	120°C 250°F	130°C 265°F	140°C 285°F	150°C 300°F	160°C 320°F	170°C 340°F
Wool-Trevira	35	35	30	25	18	12
Cotton	35	35	30	25	18	12
Linen	40	38	35	28	20	15
Wool	40	38	35	25	20	15
Viscose	30	28	25	20	15	10
Tulle	28	25	22	18	12	10
Denim	40	40	32	28	22	16
Lycra	35	35	30	25	18	12
Cotton Jersey	35	35	30	25	18	12
Synthetic Leather	40	40	32	28	22	15
Silk	30	28	25	20	15	10
Synthetics	28	25	22	18	12	10
Technical Fabrics	30	28	25	20	15	10
Fake fur	50	40	32	28	22	16

Pressure: medium

Application side:  The reverse side of the fabric is facing the heated surface of the ironing press.

Ironing aid: Teflon®, ironing cloth, silicone foam or silicone pad

Please refer to Application Manual and our Business Website [WWW.SWAROVSKI.COM/CRYSTALLIZED](http://WWW.SWAROVSKI.COM/CRYSTALLIZED) for detailed information on the application.

### Care Instructions:

							
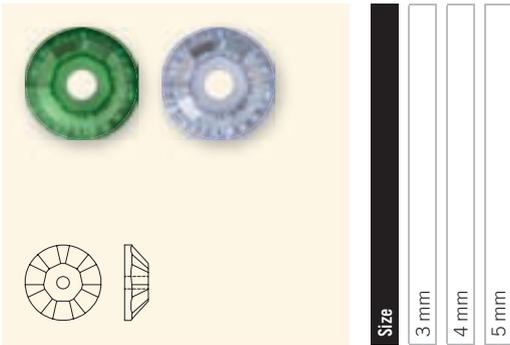

<b>General Recommendations</b>	Turn inside out, choose a gentle washing programme and use a mild laundry detergent.	Do not use chlorine bleach!	Do not tumble dry!	Turn inside out and use the iron setting for wool.	The textile can be gently dry-cleaned using perchloroethylene. Turn inside out.	The textile can be gently dry-cleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet-cleaning. Turn inside out.
	✓ Use of a soft wash bag to best protect the crystals.	✓	✓	✓ Do not iron directly over the crystals.	✓ Use of a soft wash bag to best protect the crystals.	✓ Use of a soft wash bag to best protect the crystals.	✓ Use of a soft wash bag to best protect the crystals.

Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Any oral, written or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use and processing of these techniques and products are solely user's responsibility.

# Pendants

## 6228 XILION Heart Pendant Article Explanation

<<<

### Unique XILION brilliance for the XILION Heart Pendant!

CRYSTALLIZED™ – *Swarovski Elements* continues to extend the XILION family and has upgraded the former art. 6202 Heart Pendant, which now becomes art. 6228 XILION Heart Pendant.

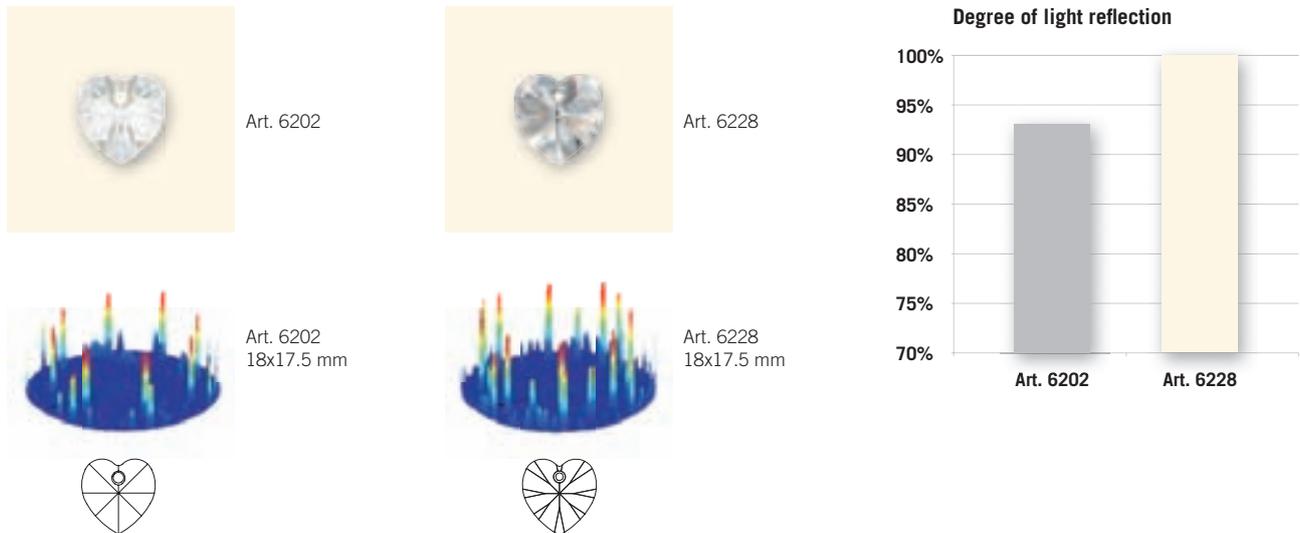

The revolutionary XILION technology, characterised by alternating small and large facets, boosts the power of light reflection and intensifies the luminosity of the reflected light. Its result is clearly visible and our upgraded XILION Heart Pendant is convincing proof of the unique XILION brilliance! The new XILION Heart Pendant is available in the same size range as the previous article.

## Brilliance that you can see and measure

<<<

When compared with art. 6202, the art. 6228 XILION Heart Pendant is a captivating crystal with distinct blazing luminosity that is generated by the increased reflection of individual points of light.

Bolder light reflection and intensified scintillation produce the optimal light distribution, which in turn results in the highly brilliant XILION look. The latest measuring and lighting techniques have been used to develop art. 6228 XILION Pendant and also to prove its inimitable brilliance.

## Product Characteristics

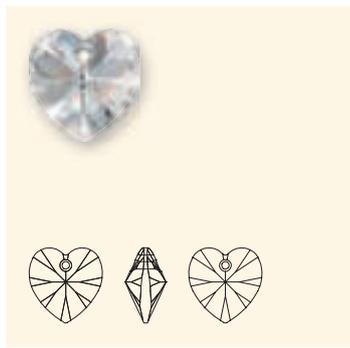

### Advantages art. 6228 XILION Heart Pendant:

- The sophisticated XILION cut results in unmatched brilliance
- Complex faceting imitates the look and luminosity of a multi-layered cut
- Clearly differentiated cut compared to all competitor products on the market
- Patent protected XILION cut by Swarovski
- Increase in number of facets enhances the appearance of the shape
- Same price level as art. 6202

### Launch and Transitional Period

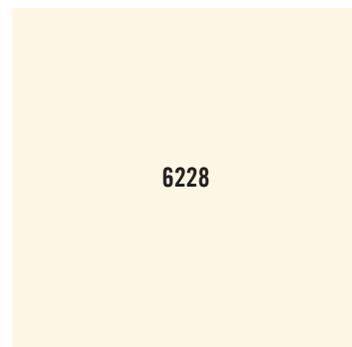

Please note that during a transitional period, we will deliver both versions (previous and new) according to their availability.

Article Explanation

<<<

Transfers-on-Roll are Transfers comprised of clear or coloured crystals (2028 SS 6 or SS 10) and applied on a carrier foil (max. 15 cm in width and max. 50 m in length). Because of the availability of very long rolls the application of XLION Flat Backs is now easier and faster. This product has been successfully tested and applied on fabric rolls and has been selected for industrial application tests in other segments.

<b>Stone</b>	2028 M HF
<b>Roll width</b>	Three roll widths available: <ul style="list-style-type: none"> <li>• 5.0 cm</li> <li>• 7.5 cm</li> <li>• 15.0 cm</li> </ul> The diameter of the core of the roll is 2 inches (≈ 5.08 cm).
<b>Roll length</b>	Max. 50 m
<b>Minimum stone quantity per 0,5 meters</b>	40 stones
<b>Sample orders – minimum order quantity</b>	Varies between motives ≈ 1 roll (50 m)
<b>Production orders – minimum order quantity</b>	Varies between motives ≈ 10 rolls (500 m)

Ordering Example & Product Variety Explanation

<<<

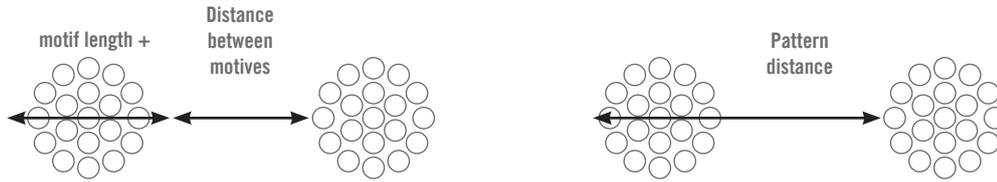

420 003	001
Article number	Stone colour corresponding to element 1

Please send the request with a drawing of the design to a Swarovski sales office near you. Make sure you include all dimensions of the requested motif. You will then receive a quotation including your article number, two different prices and minimum order quantities (for sample orders or production orders) and the drawing of your special motif in PDF format. If any changes/adaptations have to be made, contact the Swarovski sales office where you placed your inquiry. Your special motif will be produced and delivered after the confirmation of your order is received.

**Conditions of Design**

<<<

- No size combination possible within one motif
- Up to two colour combination possible per motif
- Information needed:
  1. **Distance between motives:** the distance between the last stone of one motif to the first stone of the next motif.
  2. **Pattern distance:** motif length and distance between motives.

- The max. size of a motif is 18x13 cm
- The distance between motives may be:
  - Min: 0.15 mm
  - Max: 100.00 mm

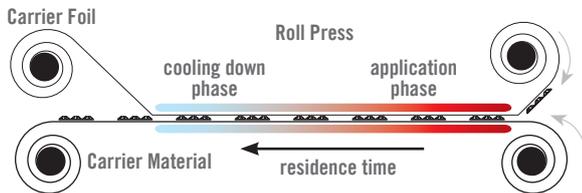

**Advice on Application**

<<<

**Hotfix application**

Transfers-on-Roll can be applied using a roll application machine. The following parameters should give you an overview about the possibilities of applying Transfers-on-Roll onto different materials. In order to ensure the right conditions and to establish the best choice of application aids, we strongly recommend carrying out tests with the original materials.

**Principle of roll application**

For the application of Transfers-on-Roll please choose a residence time which corresponds with the parameters of the Hotfix Selector for XILION Transfers.

The residence time expresses how fast a textile moves through the roll application machine and depends on the length of the press and the chosen speed.

	Temperature and approx. time (in seconds)					
	120°C 250°F	130°C 265°F	140°C 285°F	150°C 300°F	160°C 320°F	170°C 340°F

Technical Fabrics	10	9	8	7	6	5
Fake fur	60	50	40	30	20	10

Pressure: Low to medium.

Application side:  The front and reverse side of the fabric should always face the heated surface of the ironing press.

Ironing aid: Silicone foam or silicone pad should be used to compensate for any variation in height.

Speed: 1 – 2 m/min; depending on the temperature used and length of the press.

Distance between press rolls: Depends on the thickness of the carrier material, crystal height and application aid.

For more detailed information e.g. about suppliers of suitable machines please refer to our Application Manual and our Business Website [WWW.SWAROVSKI.COM/CRYSTALLIZED](http://WWW.SWAROVSKI.COM/CRYSTALLIZED).

Any oral, written or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use and processing of these techniques and products are solely user's responsibility.

**Care Instructions:**

							
<b>General Recommendations</b>	Turn inside out, choose a gentle washing programme and use a mild laundry detergent.	Do not use chlorine bleach!	Turn inside out and dry at reduced temperature.	Turn inside out and use the iron setting for wool.	The textile can be gently dry-cleaned using perchloroethylene. Turn inside.	The textile can be gently dry-cleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet-cleaning. Turn inside out.
<b>Transfers-on-Roll</b>	✓ Use of a soft wash bag to best protect the crystals.	✓	✓ Use a soft wash bag to best protect the crystals.	✓ Please note that the glue may be reactivated if the textile is ironed too long.	✓ Use of a soft wash bag to best protect the crystals.	✓ Use of a soft wash bag to best protect the crystals.	✓ Use of a soft wash bag to best protect the crystals.

Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Large double-pointed chatons make Crystal Rocks an eye-catching, luxurious and innovative new design element. The unique and brand new product is offered with a Special Motif Service which enables the design of customised patterns. Crystal Rocks is the perfect solution for the fashion accessories, jewellery and interior segments. Customised motives are possible via Swarovski Special Motif Service: Motives are created and calculated in Wattens.

A special motif is a design created by the customer, which is different from the Crystal Rocks Standard Collection. This service opens up many customisation possibilities and enables you to profit from Swarovski's longtime experience and design expertise. A range of customisation options for existing motives is available (see "Customisation Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs.

## Customisation Possibilities for Crystal Rocks

&lt;&lt;&lt;

- Min. size: 15x15 mm
- Max. size: 400x330 mm
- Min. Crystal Rocks surface: 9 mm
- Min. width of holes within motives: 10 mm
- Min. size of the smallest element within a motif: 15x15 mm

## Ordering Process

&lt;&lt;&lt;

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to (Crystal Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

## Please Note

&lt;&lt;&lt;

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motives with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks Motives may generally differ from the sketches or prints in relation to the motives' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims shall therefore not be entertained by Swarovski.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied. Please note that the simple order of a design does not grant exclusive production of this design to the customer. Over- or undersupply of +/- 10% is possible and has to be accepted.

## Application Advice & Care Instructions

&lt;&lt;&lt;

### Hotfix Application

Crystal Rocks can be easily applied using a standard heat press. The following parameters should give you an overview about the possibilities of applying Crystal Rocks onto different materials. In order to ensure the right conditions and to establish the best choice of application aids, we strongly recommend carrying out tests with the original materials.

**CRYSTAL ROCKS**

	Temperature and approx. time (in seconds)			
	140°C	150°C	160°C	170°C
	285°F	300°F	320°F	340°F
Wool-Trevira	80	65	50	40
Cotton	80	65	50	40
Denim	100	80	60	45
Synthetic Leather	70	55	45	35
Aluminium	120	100	70	50

Pressure: high

Application:  The front of the material is facing the heated surface of the ironing press.

Ironing aid: Teflon®, ironing cloth

**Gluing**

In addition, Crystal Rocks can be easily applied onto solid materials that have a surface tension of at least 38mN/m. Please use the Test Pen art. 9030/000 in order to pre-test the surface tension of the material. The surface tension indicates the suitability of the material to be glued (please refer to the Application Manual and our Business Website WWW.SWAROVSKI.COM/CRYSTALLIZED for detailed information on application, pre-testing and pre-treatment methods).

Following types of adhesives are all-rounder. Due to their features they are suitable for a broad variety of materials. In terms of handling, processing time and specific information, please also respect the operating instruction and general advice from the supplier.

		Polyurethane-Glue	UV-Glue	Double-sided adhesive tape
		Araldite 2026 www.huntsman.com	Photobond GB 368 www.delo.de	Art. 1401211 www.3F.com
Materials	Aluminum	■		■
	Glass	■	■	■
	Varnished wood	■		■

When gluing CRYSTALLIZED™ – Swarovski Elements onto solid surfaces it is advisable to create a cavity. The cavity makes it easy to glue properly and ensures a higher protection of the crystal against mechanical and chemical stress.

Any oral, written or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski’s current knowledge and the information provided by its suppliers. Such advice does not discharge customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use and processing of these techniques and products are solely user’s responsibility.

Please note that additional application information and advice will be available on our Business Website WWW.SWAROVSKI.COM/CRYSTALLIZED at the time of launch. We are looking forward to providing you with customer support during the prelaunch phase.

**Care Instructions:**

					
General Recommendations	Do not wash.	Do not use chlorine bleach.	Do not tumble dry.	Turn inside out and iron using an iron setting for silk/polyester/viscose.	Do not dry clean.
Crystal Rocks				We recommend using a protective cloth for ironing.

**Application Advice & Care Instructions**

&lt;&lt;&lt;

Crystaltex Chaton Bandings can be easily applied using a standard heat press. The following parameters should give you an overview about the possibilities of applying Crystaltex Chaton Bandings onto different fabrics. In order to ensure the right conditions and to establish the best choice of application aids, we strongly recommend carrying out tests with the original fabrics.

**CRYSTALTEX CHATON BANDINGS**

	Temperature and approx. time (in seconds)			
	140°C 285°F	150°C 300°F	160°C 320°F	170°C 340°F
Wool-Trevira	52	45	40	32
Cotton	48	42	38	30
Denim	50	45	40	32
Synthetic Leather	32	28	22	18

Pressure: medium.

Ironing aid: Teflon®, ironing cloth

 Application side: The front of the fabric is facing the heated surface of the ironing press.

In order to cut the Crystaltex Chaton Bandings into the right size we suggest pre-cutting it with a cutter knife first. Then the Crystaltex Chaton Bandings should be banded along the cut. Afterwards an optimal final cut is possible ensuring no damage of the embedded crystals.

Please note that additional application information and advice will be available on our Business Website [WWW.SWAROVSKI.COM/CRYSTALLIZED](http://WWW.SWAROVSKI.COM/) at the time of launch. We are looking forward to providing you with customer support during the prelaunch phase.

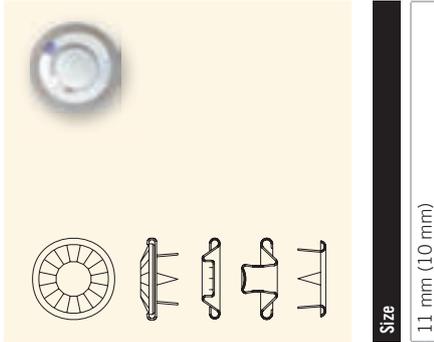

Any oral, written or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use and processing of these techniques and products are solely user's responsibility.

**Care Instructions:**

Crystaltex Chaton Bandings can be washed with 40°C.

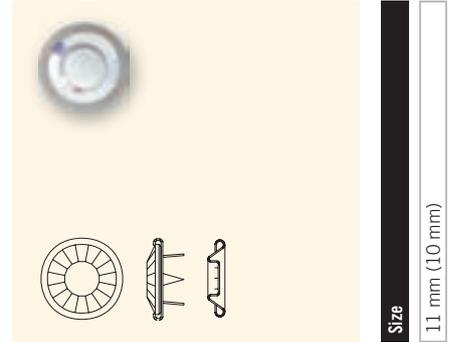

Turn inside out before washing. Select a gentle wash circle and use mild detergents. To give the crystals the best possible protection, we recommend using a soft washing bag.

#### **GENERAL WARNING**

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow or insert the crystal into nose. With crystal applied magnetic products pose a particular risk of serious intestinal injuries if ingested.

The application techniques in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

#### **WARNING FOR CRYSTAL TATTOOS**

Crystal Tattoos may be applied on health skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow or insert the crystal into nose.

#### **WARNING FOR MAGNETIC PRODUCTS**

Loose crystals may present a small parts hazard to young children, particularly children under three years old. With crystal applied magnetic products pose a particular risk of serious intestinal injuries if ingested. For each application of magnetic crystal products, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

#### **WARNING**

Application of loose crystals to tableware presents a risk of aspiration, choking, swallowing, or tooth damage. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food and crystals should never be placed on any tableware intended for use by children. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand.

The application techniques in this manual/suggestion do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

The use of crystals (which may contain substances known as hazardous) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

#### **NOTICE FOR APPLICATION ON PACKAGING**

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.
