SWAROVSKI

Swarovski Genuine Topaz in Glacier Blue evokes memories of unspoiled nature and the pristine Austrian Alps surrounding the Swarovski headquarters, still home to 30 glaciers.

We chose the name Glacier Blue to foster awareness that these unique and important ecosystems are threatened by climate change and lose up to 3% of their volume every single year.

Swarovski Glacier Blue Topaz underlines our commitment to pursue innovative and conscious solutions.

It is a non-irradiated, environmentally- and consumer-friendly reproduction of the most desirable blue topaz color.

Swarovski's creative spirit can be found in our extensive range of cuts, colors, materials, and shapes, providing inspiration and vitality or the latest seasonal trends. With exact tolerances for color grading and sorting, our Genuine Gemstones are color-matched and ready-to-set. Discover the diversity of our Genuine Gemstones and find your own individual style. Our strict calibration methods ensure that each of our stones is identical: size tolerances are kept to a minimum; heights, diameters, and girdles are uniform. The advantages for our customers are clear: premium quality, less breakage, more efficiency.

Swarovski's Genuine Gemstones lead the field worldwide, and are celebrated by international brands, designers, and manufacturers – from exclusive jewelry, watches, and eyewear, to consumer electronics. While our customers appreciate our supreme quality and creative vision, consumers are fascinated by the pure magic of our stones.

Swarovski Genuine Gemstones

MQ – STANDARD QUALITY

Swarovski MQ Genuine Gemstones are a composite of stones that are excellent in machine cut, brilliance, and polish, including stones with minor flaws, e.g. slight defects in facet symmetry, which are visible under a 10x magnification loupe. MQ stones have a clarity range from eye-clean to eye-visible. All of our MQ products are also suitable for Ingredient Branding projects.

FQ – SPECIAL REQUIREMENT

Swarovski FQ Genuine Gemstones are excellent in machine cut, brilliance, and polish. Each stone is cut to achieve perfect facet symmetry, and is color sorted. Our FQ stones are free of visible color zoning, allowing for only the slightest inclusions. FQ stones have no defects visible to the naked eye, and only minor flaws when viewed under 10x magnification loupe.

Genuine and Unique

Each of our Genuine Gemstones reflects the quality, creativity, and technical precision that the name Swarovski has come to stand for. Our exceptional stones are skillfully cut from raw, natural materials, which in turn define the limitations and supply of our selected gemstone rough. Whilst our product range is vast and varied, the supply of our listed items is subject to market availability.

NATURALLY, ONLY THE BEST WILL DO

Genuine gemstones are special, their natural qualities and colors variable. Our raw materials are carefully screened and sorted by our quality assurance team, guaranteeing only the finest quality stones, specifically chosen to meet your individual requirements.

YOUR IDEAS ARE A SOURCE OF INSPIRATION

If you are looking for something truly individual that is unavailable in our extensive product range, we can provide a solution. Our sourcing service can locate the genuine gemstones that you require, regardless of type or size.

CUSTOMER

WE AIM TO MEET OUR CUSTOMERS' NEEDS,
NO MATTER HOW DEMANDING. OUR CUSTOMIZED
SOLUTIONS ARE TRULY UNIQUE.

o s n o

RESPONSIBILITY FROM MINE TO MARKET

Genuine gemstones are a natural treasure, and we are privileged to craft their brilliance and sparkle. But with 75% of gemstones coming from small-scale mines, consistently ensuring the highest levels of responsibility is complex work. Swarovski products should positively contribute to people and planet. That's why we are working with our stakeholders to establish a fully transparent, responsible supply chain for Swarovski Genuine Gemstones; one that most benefits the communities unearthing these shining natural wonders.

Find out more about our responsible sourcing approach at
http://swarovski/responsible_sourcing

EXACT, EFFICIENT, AND UP-TO-DATE

Speak to our sales team for a daily stock report and learn more about colors and sizes before placing your order.

Packaging and Labeling

We take great care and pride in the handling and packaging of our exclusive products. The individual construction of our packaging allows for stacking, while the unique see-through design enables quick and easy identification of the contents. As a guarantee of quality and security, a special seal ensures that your Swarovski product is both original and intact.

BAR CODING

To guarantee the quality of our products, and to help trace the history of an order, each of our packages is tagged with a unique bar code label.

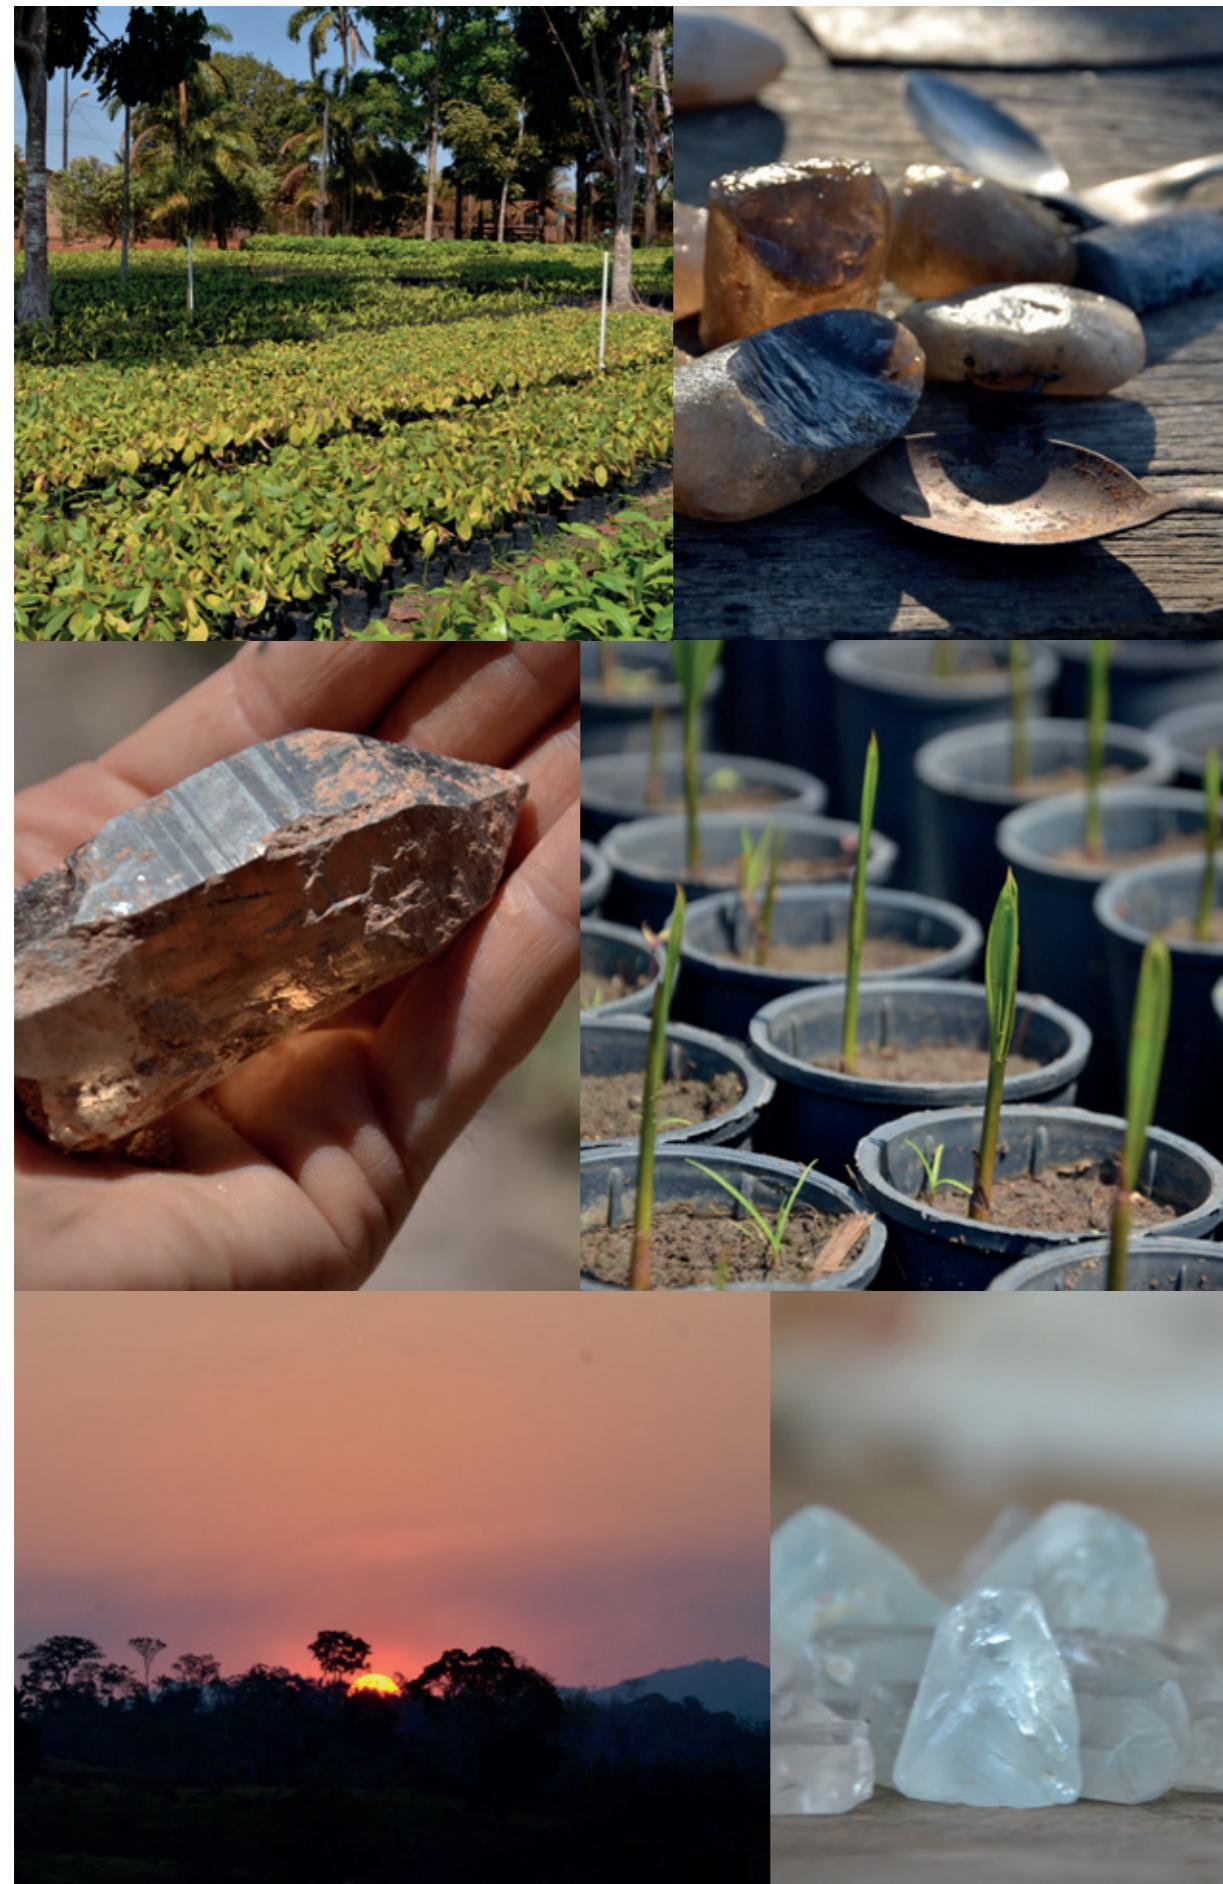

TRUSTSEAL

Our specially created Trustseal secures each product package and verifies the authenticity of our Swarovski Genuine Gemstones and Created Stones. The complex design of the seal is similar to a hologram, making it virtually impossible to imitate.

SAFETY TAB

Our strict manufacturing standards call for dependable security solutions. In order to protect our packages from tampering, we have developed the Safety Tab - an important new security feature, which is applied at the final stage of packaging. Once broken, the Safety Tabs cannot be reused, giving the customer a clear indication that the package has been tampered with. Should any of our packages be delivered damaged or with broken Safety Tabs, we kindly ask our customers to report the incident to their local sales office as soon as possible. The superior quality of our genuine Swarovski products can only be guaranteed when the Safety Tabs are fully intact. In order to open the packaging, please move the Safety Tabs in the direction of the arrow.

Swarovski Genuine Topaz is Traceably Sourced from Brazil and Responsibly Produced

Swarovski Genuine Topaz is a conscious choice. Deep in the heart of the Federal Province of Rondônia in northwest Brazil, a tin mining cooperative is making a difference by using more of what they already have. Here, the garimpeiros (miners) are recovering the topaz they reveal as an incidental part of their day-to-day work of cassiterite mining. For their community, it means an additional source of income with the potential to transform lives. For Swarovski customers, it means no fresh earth has been broken to source stunning Swarovski Genuine Topaz. In fact, we can trace every gemstone back to the single pit it was recovered from.

We want to be proud of the places we trace Swarovski products back to. Even though we are simply making improved use of an existing activity, we still ensure that the working environment meets our responsible sourcing standards. We have agreed a fair, fixed price for the topaz that protects workers from fluctuating markets, and we are providing training to help a generation of tin miners become topaz experts too. As a founding member of CGWG - the Colored Gemstones Working Group - we helped establish the world's first colored gemstones responsible sourcing tools. Using this due diligence framework, an independent organization assesses the mine we

buy from. If they find any gaps in environmental, social or governance practices, an action plan is put in place to raise standards.

We believe that Swarovski products should contribute to a better world, so we invest in a food program to support the least privileged members of the mining community. We are also actively trying to improve the environment by establishing a relationship with a local non-profit organization. Through this new partnership, we investigate how we can help restore Brazilian forests vital to both local livelihoods and worldwide carbon commitments.

Our responsibility does not end once the gemstones are gathered from the ground. All Swarovski Genuine Topaz is precision-cut at production centers we own which are certified by the Responsible Jewellery Council, and we are proud that the vibrant colors of our Genuine Topaz are achieved through our unique, environmentally friendly color treatment, without the need for irradiation.

Swarovski Genuine Topaz

Precision cut from first-class raw materials, we guarantee only the finest quality with our genuine topaz. Fresh, clear, and with exceptional color consistency, topaz has never been so bright.

NATURAL BRILLIANCE

Swarovski's Natural Brilliance Cut infuses round topaz with radiant light, intensifying the original beauty of the stone with a skillfully balanced, precision cut. According to scientists at the Fraunhofer Society, Europe's largest application-oriented research institution, the Natural Brilliance Cut for Swarovski Genuine Topaz has proved to be vastly superior to the standard Topaz Round Star Cut in brightness and fire, possessing more pronounced dispersion effects, and more and brighter reflections. In correlation to the GIA metric, which was originally developed to analyze the light performance of round brilliant cut diamonds, the Fraunhofer metric has been shown to amount to 70 % for light return and 90 % for fire when evaluating a set of 130 test geometries of brilliant cuts.

CENTRIA LINE FOR SWAROVSKI GENUINE TOPAZ

Swarovski Genuine Gemstones are designed and manufactured with technical expertise and creative passion. Our Centria Line complements our existing product range for precision-cut genuine topaz. The Centria Line includes qualitative parameters as well as a product assortment definition for larger sizes of Swarovski Genuine Topaz.

SORTING CRITERIA FOR CENTRIA LINE

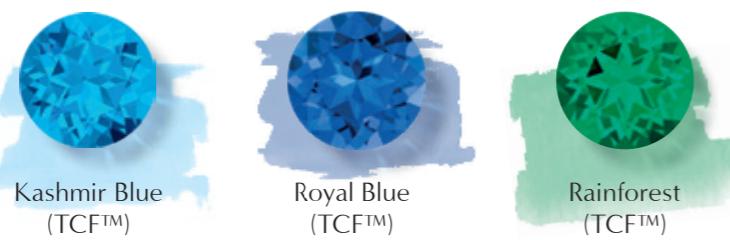

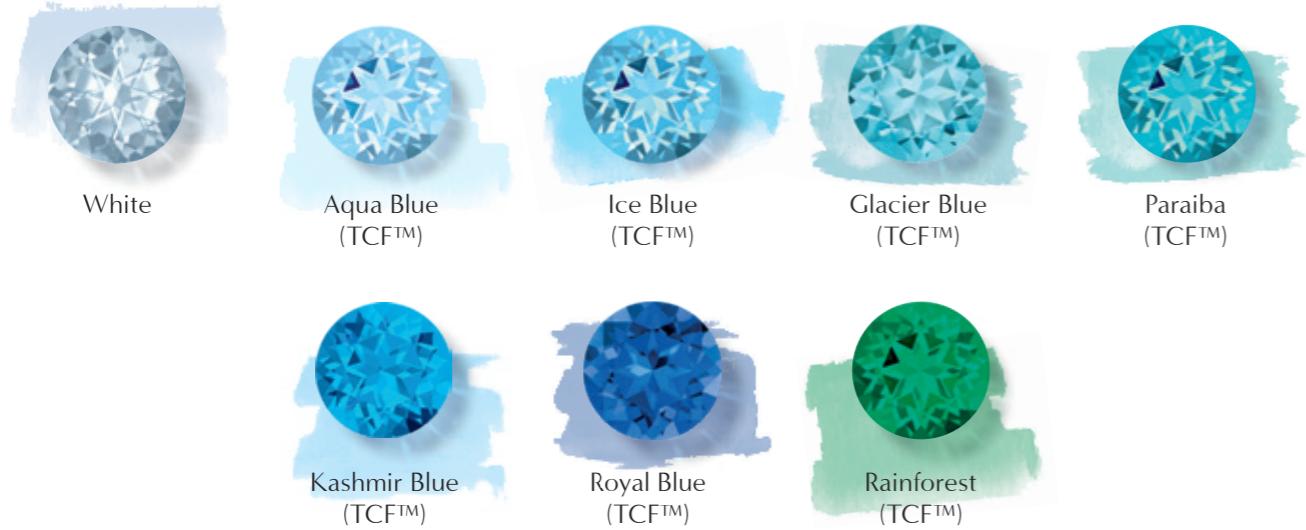

Our Centria Line stones are carefully sorted to meet and exceed the highest market standards.

QUALITY STATEMENT ON CENTRIA LINE

Tolerances	0.15 mm
Polishing	excellent, with polished girdle
Facet Geometry/ Symmetry	produced to meet the most stringent standards in cutting technology
Proportions	girdle to table precise and consistent, slight variation in height (average up to 13% of total height)

Genuine Topaz Colors

TCF™ (THERMAL COLOR FUSION)

Topaz is naturally white and perfectly pure. Our Natural Brilliance Cut brings out the true character of the stone, while our TCF™ treatment offers creative diversity with an exciting range of colors. Swarovski's patented TCF™ technology (Thermal Color Fusion) enhances the surface of the stone with a permanent, hard-ceramic enhancement, which is resistant to production and cleaning methods such as ultra-sonic, magnetic pin, and acid baths. Unlike the irradiation treatment, which modifies the entire gemstone, our TCF™ technology restricts the coloration to the near-surface region of the stone. Swarovski Topaz therefore contains no radiation.
